

The **COVID-19 Quarantine and Testing Risk Framework for Field Work** guidance has been archived.

For those conducting field work, ensure that your field research activities are accounted for in your COVID-19 Prevention Plan; COVID-19 precautions may also be incorporated into a more general [Fieldwork Safety Plan](#).

In addition, researchers should reference and follow the below precautions around travel, as applicable:

- [UW FAQs on Travel and Study Abroad](#)
- [CDC Guidance on International Travel During COVID-19](#)
- [CDC Guidance on Domestic Travel During COVID-19](#)
- [University National Oceanographic Laboratory System \(UNOLS\) COVID-19 – Considerations for Scientists and Operators](#)

EH&S is available for consultation and to assist in risk assessments if more stringent quarantine and testing frameworks are needed for specific fieldwork operations.
