COVID-19 INFORMATION FOR UNITS WITH CONTRACTORS AND VENDORS WORKING ON SITE

The University of Washington COVID-19 Prevention Plan for the Workplace ("UW COVID-19 Prevention Plan") helps ensure the health and safety of on-site personnel by reducing the potential for COVID-19 transmission. The UW COVID-19 Prevention Plan must be followed in all University work environments. Personnel in UW Medicine medical facilities should follow the UW Medicine policies and procedures.

This document provides COVID-19 prevention information for University units to review with contractors and vendors hired to work in University facilities. This document does not apply to non-UW personnel conducting activities at a University location who are supervised daily by UW personnel; these individuals follow the UW COVID-19 Prevention Plan and any unit or site-specific COVID-19 Prevention Plan(s).

Contractors and vendors must adhere to all COVID-19 signage posted at University facilities, and any location-specific requirements, in addition to the requirements described in this document.

Listed below are University COVID-19 Prevention Plan elements that contractors and vendors are required to follow:

1. Vaccination verification requirement

University units must ensure that contractors and vendors performing work or providing services have submitted the COVID-19 Vaccination Requirement Declaration form to UW Procurement.

All units must communicate with any existing and new providers of goods and services, to make them aware of this requirement and direct them to the UW COVID-19 Prevention Plan www.ehs.washington.edu

As a supplier, vendor or contractor of the University, the contractor or vendor is responsible for:

- Determining whether Washington State Governor's COVID-19 Vaccination Requirement 21-14.5 Proclamation applies to them, and

- Ensuring their representatives, including employees and subcontractors, comply with this requirement, if applicable

Contractors and vendors are exempt from this requirement when they are

- Physically present at a site for only a short period of time and any moments of close physical proximity to others on site are fleeting; or

- Performing work in an area where separation from students and people receiving services can be controlled and maintained by the contractor (the separation is
achieved only when the contractor is removed from the same air space as students, it cannot simply be distance or a small plexiglass barrier); or

- Primarily performing work outside and the work does not involve delivery of health care services.

University units may access the list of contractors and vendors that have submitted their declaration forms at https://finance.uw.edu/ps/suppliers.

2. **Face coverings and personal protective equipment**

Contractors and vendors are required to follow the UW COVID-19 Face Covering Policy at all times when at a University location, and follow any posted requirements in specific buildings or spaces. University units should share the UW COVID-19 Face Covering Policy and ask contractors and vendors to follow instructions posted on signage in and around University buildings.

Contractors and vendors are required to follow all UW worksite safety requirements, including the use of required personal protective equipment (PPE). Cloth face coverings do not replace required job-specific PPE.

3. **Procedures for sick personnel, symptom screening and reporting:**

   An individual cannot be allowed on site at a University location if they are experiencing COVID-19 symptoms. In addition, all vendors and contractors must adhere to the guidance in the COVID-19 Public Health Requirements and Guidance Flow Chart.

   a. **Reporting:** A University department or unit that learns of a suspect or confirmed COVID-19 case among an employee, contractor or vendor is required to notify UW Environmental Health & Safety (206.616.3344 or covidehc@uw.edu) for public health follow-up. In addition, the University unit requests that the contractor or vendor report cases of COVID-19 positive employees that have worked at a University worksite.

   b. **Symptom Screening/Attestation for COVID-19:** University contractors and vendors who work on site at a University work location where symptom screening or attestation is required by the University unit will be required to complete a symptom screening or attestation as applicable.

4. **Maintain physical distancing where required**

   Personnel must maintain at least a six-foot distance between individuals in health care facilities. UW units should notify contractors and vendors of any physical distancing requirements at University locations where they may be working.

5. **Practice good hygiene**

   Contractors and vendors are encouraged to engage in good hygiene practices to reduce the risk of spreading COVID-19:
a. Cover your mouth and nose with your elbow or a tissue when you cough or sneeze.
b. **Wash** your hands often with soap and water, for at least 20 seconds, or use hand sanitizer that contains at least 60% alcohol if soap and water are not available.
c. Avoid touching your eyes, nose or mouth with unwashed hands.
d. Avoid contact with people who are sick.
e. When you are sick, stay home and avoid close contact with others, even if you are vaccinated against COVID-19.

6. **Clean and disinfect** work surfaces, tools and equipment

Contractors and vendors are required to clean (and disinfect as needed) their worksite surfaces, tools and shared equipment according to the L&I regulations. Custodial contractors follow the University's **COVID-19 Cleaning and Disinfection Protocol**.

Follow the manufacturer's instructions for use of all cleaning and disinfecting products and use personal protective equipment (PPE) as required.

7. **Traveling to a University location from outside Washington state**

Follow the **CDC travel guidelines** for domestic and international travel.
